Instructions

READ EVERY QUESTION AND INSTRUCTIONS CAREFULLY

Write in a legible handwriting

The examiner is not going to search for the answer so be very specific.

Write all sub questions of a main question in sequence and same order

Cancellation of options shall be clear and bold without any scope for doubt

All 2 mark questions that need justifications shall have just 2 lines of justification

Q1. Draw a neat labelled diagram of the Business Environment of any organization.
Do not describe anything (5 Marks)

Q2. Do as directed (only write the answers--do not rewrite the questions again)

A. Draw an organization with 4 levels and span of control of 2 (2Marks)

B. Caselet: (2 Marks)

In Silver Linings Ltd, a performance appraisal was conducted and when ratings are plotted as a frequency distribution:

Most ratings cluster around the mean (neutral or middle point) and very few ratings appear at the high or low extremes.

This is called a _____ error

The graph so obtained is _____ in shape. Draw the shape of the curve using number of employees as a variable and a 5 point rating scale. Make your assumptions on the number of employees.

C. Caselet (2 Marks)

ABC Manufacturing Company has recently decided to expand its market share over the next five years. Following this decision, the Marketing Manager develops a one-year plan to increase regional sales by 15%. The plan includes conducting local promotional campaigns, offering seasonal discounts, and likewise.

The marketing manager is making a : strategic/operational/tactical plan

Choose the option and justify the same in 2 lines (without the correct justification no credits will be awarded to the correct option)

D. Caselet:

(2 Marks)

At NovaTech Industries, the CEO announces a major goal: to increase the company's market share in the electric vehicle segment within three years.

The R&D department focuses on battery innovation, the marketing department prepares awareness campaigns, and the finance department allocates funds for expansion. All departments operate under a single integrated master plan for the EV project.

Identify which principle of Fayol is represented here and justify the same in 2 lines
No credits awarded for the correct option if the justification is not correct

E. Caselet

(2 Marks)

Tesla, Inc. is known for encouraging innovation, rapid decision-making, and cross-functional collaboration among engineers working on new electric vehicle models. Employees often work in fluid teams and are expected to solve problems creatively without waiting for lengthy approvals. However, at the same time, Tesla's vehicle manufacturing plants operate with strict production schedules, standardized operating procedures, detailed reporting systems, and centralized quality checks to ensure safety compliance and efficiency.

Recently, a management trainee concluded that Tesla follows only a mechanistic structure because it has formal production rules and centralized quality control.

Is the trainee's conclusion correct? What is your observation and inference? Justify in 2 lines
